1. 다음 글의 밑줄 친 This(this)가 가리키는 것은?

Do you feel lost when you sit down and write a composition? When you sit down to write one, where do you begin? Once you have gathered all the information you need, how do organize it? For these questions, this is a good answer. This is a condensed plan for a piece of writing. The ideas that crowd your head when you write can become confused unless you have a plan. This will help you put your ideas into a logical order. When you finish this, you've got the framework of your composition. (Well begun is half done!) Then you can move on to the next step.

- ① a topic ② a title ③ an outline
- ④ an index ⑤ an introduction

2. 다음은 어느 책의 목차 중 일부이다. 이를 참고하여 유추할 수 있는 사항으로 적절하지 않은 것은?

3. 다음 글에 나타난 'he'의 현재 심경으로 가장 적절한 것은?

The books in this section were on a high shelf out of his reach, but he located a small stepladder over by the encyclopedias and quietly moved it into position. Unfortunately, as he was coming back down the ladder, the book he had taken off the shelf slipped out of his hand and fell to the floor with a loud crash. Everybody in the library looked up at him at the same time, obviously annoyed by the disturbance. Phil felt his face turn red as he picked up his book, which luckily did not seem to have been damaged by the fall.

- ① angry ② indifferent ③ festive
- ④ embarrassed ⑤ proud

4. 아래에 주어진 사전 뜻풀이 가운데, 밑줄 친 fair의 의미로 가장 적절한 것은?

People from states with few people felt that each state should have an equal vote. But states with more people felt that they should have more votes. To make voting fair, the two houses of Congress are elected using different systems.

fair 1. that is allowed to be done: *It is not fair to kick another player in football.* 2. showing by favorable conditions: *She was in a fair way to win before she fell.* 3. having a good clear appearance or quality: *I have made you a fair copy of the report.* 4. fairly good, large, fine: *His knowledge of the language is fair.* 5. free from dishonesty or injustice: *He's fair even to people he dislikes.*

- ① 1 ② 2 ③ 3
- ④ 4 ⑤ 5

5. People cannot always _____ even if they try to. A student may say she is not nervous about a test but will bite her lower lip and blink more than usual, actions that often indicate nervousness. A young man waiting for a job interview may attempt to appear calm and casual, but will cross and uncross his legs continually, straighten his tie, touch his face, play with his hair. The average pitch of the voice is higher when someone is lying than when he or she is telling the truth.

- ① tell nothing but the truth
- ② hide their true emotions
- ③ do their best in everything
- ④ understand what others say
- ⑤ keep still if they are alone

6. Sound waves from an object moving away from you have a lower frequency. So do light waves. The different colors in the spectrum have different frequencies. Violet has light waves of the highest frequency. Red light waves have the lowest frequency. Scientists studied the motion of the stars in distant galaxies. They discovered that the light from these distant galaxies shifted slightly towards the red end of the spectrum and had a lower frequency. Astronomers concluded that these galaxies _____.

(2점)

- ① are getting brighter and brighter
- ② are moving away from the earth
- ③ do not allow even light to escape
- ④ send light in different directions
- ⑤ are getting smaller and smaller

7. Wolves live on a variety of foods, from mice to fish, to the larger deer and moose. They only kill what they can eat. Hunting in packs is necessary for chasing and killing large prey. Wolves never attack a large, healthy deer or moose, which can easily defend itself with sharp kicks. Wolves pursue herds to find the sick or weak members. This may seem

cruel, but they are actually doing the herd good by keeping it strong. Also, without natural enemies, herds will overpopulated their territory and use up the food supply. Many will eventually _____.

- ① flee
- ② thrive
- ③ starve
- ④ be captured
- ⑤ be hunted

8. “The Talking Head” is a famous magic trick. Very few people have ever guessed how it works. Do you know how the magician has done this feat? The secret is a mirror. The magician has put a mirror between one front leg of the table and one back leg. But what you are seeing is a reflection of a front leg. You think you are seeing a whole table, but you are seeing only half. A woman is kneeling behind the mirror. Her head sticks out through a hole in the table and the plate. You are not really seeing a lone head. The body is _____.

(2점)

- ① hidden somewhere else
- ② shown directly to your eyes
- ③ appearing slowly
- ④ shown on and off
- ⑤ just blocked from your eyes

9. As to why there are few Koreans working in jobs that they consider dirty, dangerous, or difficult, there are a few theories. One probable reason could be Korea's rapid economic development. The country was recently quite poor, and throughout the development period most people were forced to work at dirty, difficult, or dangerous jobs. Koreans have always placed great importance on education, so as their incomes grew, more and more families sent their children to college so that they wouldn't have to do the same kind of 3-D jobs that they themselves had to do. The result is a highly-educated population with an oversupply of professionals and _____.

- ① a shortage of experts
- ② an education boom
- ③ the export of robots
- ④ a shortage of laborers
- ⑤ brain drain

10. Out of ignorance, we get the constant wonder of discovery. Every fact of nature comes to us each spring, if only we are sufficiently ignorant, with the dew still on it. If we have lived half a life time without having seen a cuckoo, and know it only lived half a time without having seen a cuckoo, and know it only as a wandering voice, we are all the more delighted at the spectacle of its runway flight as it hurries from wood to wood. It would be absurd to pretend that the naturalist does not also find pleasure in observing the life of the birds, but his is a steady pleasure, compared to the morning enthusiasm of the man who sees a cuckoo for the first time.

- ① nature of ignorance ② observation of nature
- ③ pleasure of ignorance ④ knowledge of nature
- ⑤ discovery of truth

11. People are always talking about ‘the problem of youth.’ If there is one — which I take leave to doubt — then it is older people who create it, not the young themselves. There is one difference between an old man and a young one: the young man has a glorious future before him and the old one has a splendid future behind him: and maybe that is where the rub is. When I was a teenager, I felt that I was just young and uncertain — that I was a new boy in a huge school, and I would have been very pleased to be regarded as something so interesting as a problem. For one thing, being a problem gives you a certain identity, and that is one of the things the young are busily engaged in seeking.

In December 1952, a heavy fog brought danger and even death to London. Because of the fog, all land, sea, and air traffic in and out of London stopped. Accidents and illnesses increased. The blinding fog kept people ① from rescuing the sick and injured. The great December fog started like most other London fogs. Cold, damp air settled over the city. There was hardly any wind. The fog formed and ② thickened as dirt and dust swirled up from the streets. Smoke from millions of chimneys had no place to go and ③ mix with the fog. The fog turned dark brown, then black. It ④ lasted for four days. Scientists found that air pollution ⑤ was partly to blame.

Bionics is a kind of marriage between biology and electronics. Its aim is to find out how animals' apparatus work so that man can copy them for his own use. In some of the older branches of science, the name bionics raises half-smiles and scorn. Perhaps it does seem strange for a modern scientist to study toads, blind fish, or spiders. To some, this may sound more like medieval magic than science. There are a host of other animals, such as bats, beetles, electric fishes, and eels. However, when you look at the things these creatures can do, the importance of bionics suddenly hits you.

Bionics may be _____(A)_____ for humans to get some hints from animals, even if some people are _____(B)_____ of the effectiveness of it.

16. In 500 B.C., in ancient China, Confucius had a favorite cat, and he mentioned this cat with respect and affection in his writings. In India, cats appear in many Sanskrit writings from more than 2,000 years ago. Much later, in 600 A.D., Mohammed, the prophet who founded the Islamic religion, often preached while holding his favorite cat in his arms. At the same time, the Japanese started keeping cats in places where they kept their most precious holy writings because they believed the cats would protect these manuscripts. In ancient times, it was considered extremely good luck if a cat crossed your path.

18. The fact is, successful people move through life with a different attitude than most. They know what insight or solution may come to them in unforeseen contacts with people. They are never too busy to meet new people and to keep up old acquaintances. They chat with the person next to them on a plane and exchange business cards. They join clubs and professional organizations. They talk, and are talked about. The head of a New York executive-search firm said many of his prospects for top jobs are simply people who have made themselves known to other people.

- ① 많은 사람들과 교분을 맺으라.
- ② 다른 사람들의 말을 잘 경청하라.
- ③ 다른 사람들에게 먼저 모범을 보여라.
- ④ 다른 사람들의 화제의 대상이 되지 말라.
- ⑤ 사람들과의 필요 없는 접촉은 가급적 피하라.

19. I just think the space program costs too much and that society would benefit more from improved social programs than from space exploration. If we could have both—an elaborate space program and really good social welfare programs—I would be very happy. But if we have to choose, I am in favor of choosing to invest in social welfare programs. People need food, shelter, jobs, education—bread-and-butter necessities. Space programs won't provide these basic essentials of a decent life.

20. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

While it takes courage to achieve greatness, it takes more courage to find fulfillment in being ordinary. We are on individual quests for what is ultimately satisfying in life. Every now and then, those quests produce quite a surprise. For the joys that last have little relationship to achievement. The sun rises and sets in glorious color over every square inch of the earth, in full view of every living creature. You don't have to jump higher than anyone else to see it. The adventure in being ordinary is working hard for the joy of being tired at the end of the day. It is caring and sharing and giving and loving.

One of the most common myths about college professors is that they lead easy lives of quiet speculation while teaching one or two classes every week. ①However, college professors do much more than go to class. ②In fact, the time they spend in classroom instruction takes up a relatively small part of a typical-workweek. ③Some professors are required to repay the debt of being helped by professors in their own days as college students. ④The average professor spends between six and fifteen hours in the classroom weekly, compared to the thirty hours or more a high school teacher spends. ⑤Yet that same college professor works from sixty to eighty hours a week in his laboratory.

22. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

There is, however, an alternative to being silently miserable and dissatisfied.

Unfortunately, many students believe they cannot control the quality of instruction they receive at their university. (①) They think that their only option is to complain privately but say nothing in public. (②) Students would have a lot more control over the quality of their instruction if they would consider using a public *rating system for their professors. (③) With such a system, teachers would be rated on everything from willingness to hold office hours to clarity of lectures, and the results would be published schoolwide. (④) Such a rating system could serve to guide students in the selection of courses. (⑤) Such a system of public rating would have long-term effects as well. *rating: 평가, 전적

24. 다음 글의 내용을 가장 잘 표현한 속담은?

A person who is called upon to act is more likely to act fortunately if he has previously meditated upon actions of similar kind. If we wish to play an effective part as members of a community, we must avoid the danger of rushing into action without thinking about what we are doing, or—which in practice comes to the same thing—by taking it for granted that it is “all right” to do as others do, although we don't in the least know why they act thus. Thinking is primarily for the sake of action. No one can act wisely who has never paused to think about how he is going to act.

- ① Man is a thinking reed.
- ② Too many cooks spoil the broth
- ③ A burnt child dreads the fire.
- ④ Look before you leap.
- ⑤ Don't count your chickens before they are hatched.

25. Deep Springs에 관한 설명 중, 다음 글의 내용과 일치하지 않는 것은?

Deep Springs is an experiment that began in 1917. When Lucien L. Nunn, a gold mine owner, started Deep Springs as a two-year college, he was not sure about it. He knew that the ideas for his school might not work. Nunn wanted to take students to a working situation. He wanted them in a place away from the distractions of the city, things that keep students from studying and thinking. He wanted the students to develop respect to physical work. That is why Deep Springs students must work twenty hours a week.

A few years ago it first became known that the number of boys being born in Korea was starting to outnumber the number of girls being born. It was (a) the result of medical advancements which now make it possible for doctors to determine the sex of the unborn fetus long before birth. Of course it is natural that parents expecting a baby are curious to know whether they'll be getting a son or a daughter. But in Korea there is a much more wicked purpose to this sex-determination procedure, and it goes far beyond pure (b) curiosity. It is to make sure that the baby will be a boy and not a girl. Fetuses which are found out to be female are often aborted. (c) This practice which is caused by the age-old Korean tradition of favoring boys over girl is now threatening to turn into (d) a big social problem just a few years from now. If nothing is done to stop (e) the trend, Korean society will soon be changed forever. In 1997 the ratio of boys to girl in some Korean elementary schools was almost two boys to every girl. Sociologists warned of an coming social disaster. Koreans apparently started to take their warnings seriously, because by 2001 the situation improved to about 109 boys being born for every 100 girls. While this was an improvement, it was still not enough to solve the problem.

(A)

The law affects your family's buying power. When prices go down, your money buys more. On the other hand, when prices go up, your money buys less. When money loses its value for trading goods, there is inflation. For example, the same dollar that bought five loaves of bread twenty years ago can buy only one loaf of bread today. In this case, you need more money to buy the same goods.

(B)

When there isn't enough of something for everyone, we say that there is a shortage. When there are shortages, prices go up. When there are shortages of goods and prices go up, businesses try to make more goods. As a result, the supply of goods gets larger. Then the prices start to come down. Economists study price changes and try to explain and predict future changes. They have named this rise and fall of prices the law of supply and demand.

(C)

If wages don't keep up with inflation, people can't buy as much. Business slows down, and people are laid off from their jobs. This is called a recession. If a recession goes on long enough, it turns into a depression. Banks and businesses close. Millions of people lose their jobs and their homes. Consequently, they lose purchasing power, which makes the whole thing worse.

These days, people who do manual work often receive far more money than clerks who work in offices. People who work in offices are frequently referred to as 'white collar workers' for the simple reason that they usually wear a collar and tie to go to work. Such is human nature that a great many people are often willing to sacrifice higher pay for the privilege of becoming white collar workers. This can give rise to curious situations, as it did in the case of Alfred Bloggs who worked as a dustman for a company.

When he got married, Alf was too embarrassed to say anything to his wife about his job. He simply told her that he worked for the Corporation. Every morning, he left home dressed in a fine black suit. He then changed into overalls and spent the next eight hours as a dustman. Before returning home at night, he took a shower and changed back into his suit. Alf did this for over two years and his fellow dustman kept his secret. Alf's wife has never discovered that she married a dustman and she never will, for Alf has just found another job. He will be earning only half as much as he used to, but he feels that his rise in status is well worth the loss of money. From now on, he will wear a suit all day and others will call him 'Mr Bloggs', not 'Alf'.

30. Alfred에 관한 설명 중, 윗글의 내용과 일치하지 않는 것은? (2점)

- ① He said nothing to his wife about his job as a dustman.
- ② He used to go to work dressing like a white collar worker.
- ③ He cheated his wife due to the sense of shame about his job.
- ④ His former job gave him twice as much salary as the new job.
- ⑤ He liked his job, which he decided to quit because of the poor pay.

31. 밑줄 친 his rise in status의 내용으로 가장 적절한 것은?
